What is Mobilix?

Mobilix is an advanced mobile platform designed to optimise transport processes and equipment deployment in the field. Its innovative design allows a tangible increase in operational efficiency and productivity.

CAPACITY:

Up to 400kg

DIMENSIONS:

Width: 80cm to 120cm | Length: 100cm

THE MOBILE WORKING PLATFORM

MOBILIX is a system developed by WM System, designed to be combined with electric pallet trucks. It is an advanced mobility solution that offers a mobile, compact and functional working platform, ideal for a variety of operating sectors.

TECHNICAL SPECIFICATIONS

COMPATIBILITY

Designed to be used **exclusively with electric pallet trucks** (not supplied by WM System).

DIMENSIONS & MATERIALS:

Loading space:

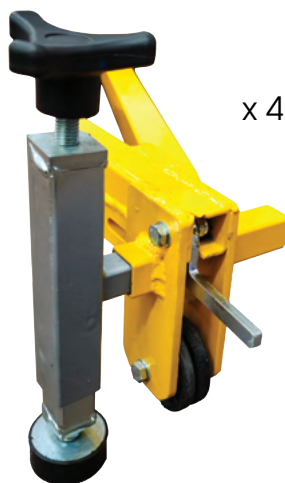

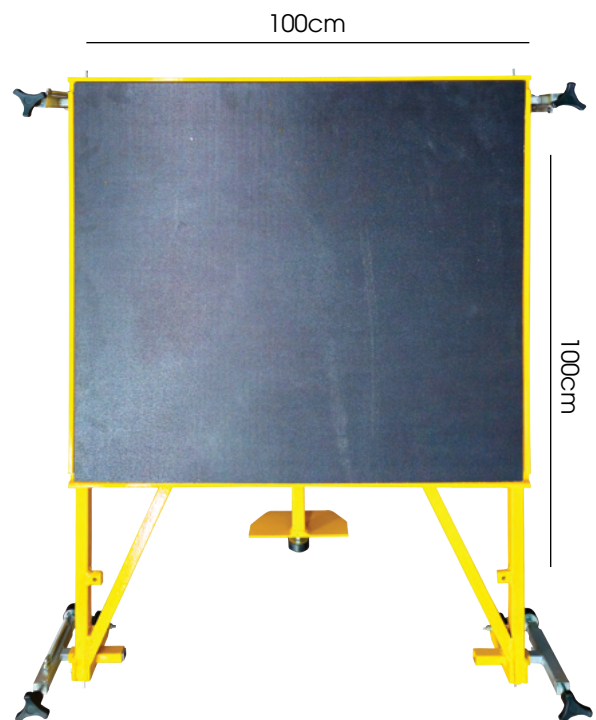

Standard version 100 x 100 cm.
Customisable dimensions.

Loading surface material:

12 mm plywood marine wood.

Frame material:

Yellow painted iron.

STABILITY:

Equipped with 4 adjustable stabilising feet to ensure stability during use and transport.

MODULAR OPTION

FEATURES:

Capacity:
100kg

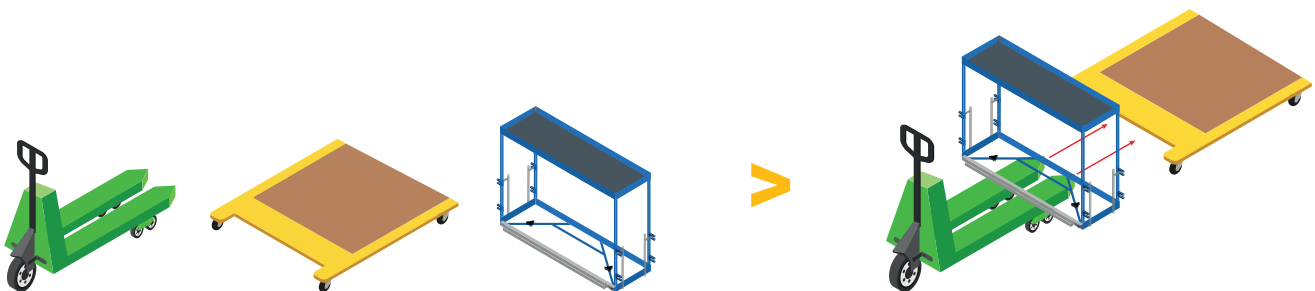

Frame material:
Iron and aluminium painted blue.

Load space:
Customisable dimensions

FUNCTIONALITY:

A **stand for generator and compressor**, useful for powering equipment requiring electricity and compressed air. Easily removable when needed and interchangeable.

APPLICATIONS

WE HELP YOU CHOOSE IT

With MOBILIX, you can overcome any logistical limitations, bringing work directly to your customers, even in remote or hard-to-reach areas. Describe your job to us and we will help you configure the MOBILIX that **fits and meets the needs of your industry**:

For workshops and repairs

Complete set up with drawers and work surface.

For the mechanical industry

Specific equipment to replace and balance tires.

For the construction industry

Configuration equipped with compressor, tanks and material vanes.

For professional cleaning

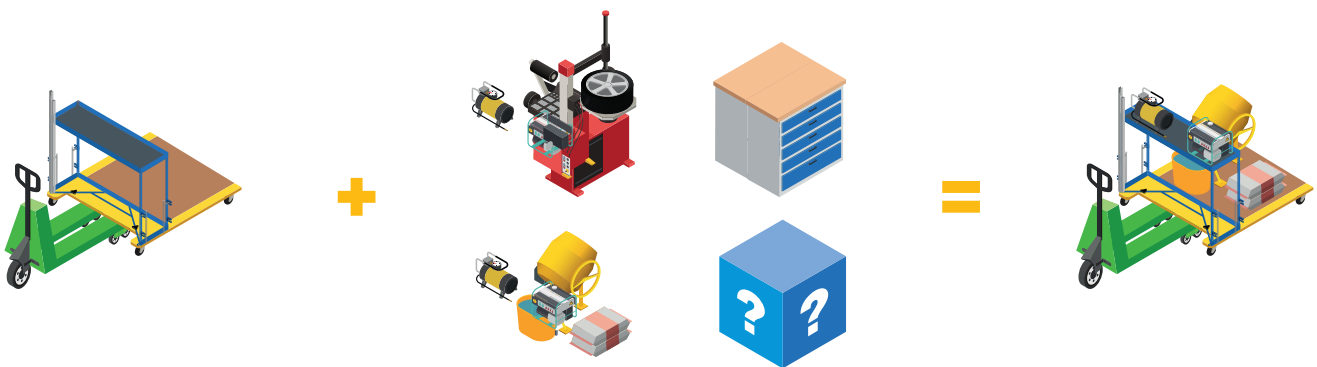

Fully equipped with vacuum cleaners, tanks and pressure washer.

BENEFITS

CONFIGURE IT AS NEEDED

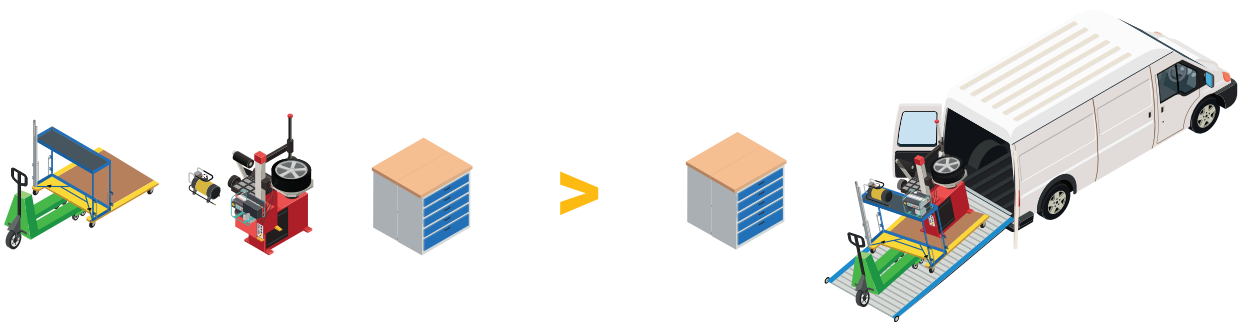

The Mobilix is designed with a modular system that allows components to be quickly replaced, adapting to seasonal needs or different types of operations.

SELECT YOUR MODULE

For example:

During the winter season, you can install the tire change module, while in the summer **you can switch to the service module**. With a single basic frame, you optimize costs, space and set-up time, ensuring **maximum versatility at any time of year**.

TOTAL FLEXIBILITY

Unlike traditional solutions, MOBILIX requires no fixed mounting on the vehicle. No drilling, permanent anchors or structural modifications are required, making it compatible with any van, including electric vans.
